

# KiwiZone

Zone detection system for work areas

KiwiZone allows you to manage vehicle passage in high-risk areas.

When the vehicle enters a risk zone, KiwiZone slows the vehicle down and maintains the set speed until it exits this area.

Dimensions	130x130x50 mm
Power supply	5 - 140 VDC
Interface	CANBUS

## All the advantages

Automatic slowdown of the vehicle

Installation on fixed structure

Quick and easy installation

High versatility for every need

KiwiZone slows down the vehicle in the **danger zone**
