Key Range

Multi-brand fleet management system

KeyOne
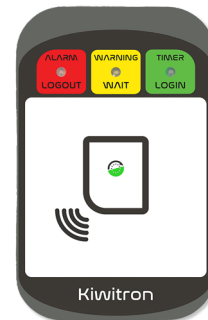

Black box for data collection

- GPRS/LTE localisation - GPS/GNSS
- CAN bus/RS232 protocol
- Access control with I-Button
- Impact sensors
- Integration with safety and management systems
- SIM data sending
- Barcode scanning

KeyAdvanced

Datalogger with RFID badge

- GPRS/LTE localisation - GPS/GNSS
- Access control with RFID badge
- Impact sensors
- Integration with safety and management systems
- SIM and Wi-Fi data sending

KeyTouch

Datalogger with touch display

- GPRS/LTE localisation - GPS/GNSS
- Access control with RFID badge and pincode
- Impact sensors
- Integration with safety and management systems
- SIM and Wi-Fi data sending
- Checklist

Innovative *fleet* management system

Access control

The system **recognizes and enables** only authorized operators to use the vehicle and also analyses their driving style.

Impact detection

The device has a **3-axis accelerometer** that detects impact intensity and magnitude.

Checklist

The KeyTouch system allows the vehicle to be switched on only after the **pre-operational safety checklists** have been completed in order to operate the vehicle safely.

Localisation

The Key system allows the **vehicle to be geolocalized**, report any moving away from position and record the route.

All your data in the cloud

You can quickly control the **analysis of your data** wherever and whenever you want, from your PC, tablet and smartphone thanks to the Kiwisat cloud.
