

KIWISAT

Cloud fleet management
to monitor your fleet

KIWISAT

Cloud fleet management

Kiwisat cloud shows the status of your fleet, providing important and real-time data about vehicle and driver conditions.

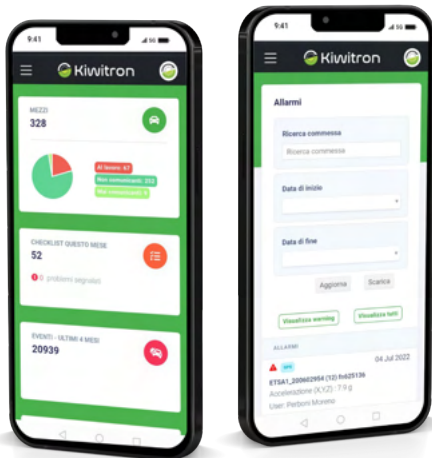

Multilingual

Open and free APIs

Customizable dashboard

Kiwisat is also available on APP for real-time and remote monitoring of data and usage.

The app is a view-only service and allows monitoring of the portal homepage and the windows for vehicles, alarms, and maps.

Your fleet in cloud

What can you monitor?

Battery status

To monitor fleet efficiency and safety.

Heatmaps

To visualize high-risk areas, near-misses, and prevent collisions.

Position and Geolocation

To track the real-time location and movements of each vehicle.

Scheduled and Predictive Maintenance

To manage maintenance tickets, plan interventions, and avoid vehicle downtime.

User and Assignment Management

To manage vehicles, assigning each vehicle to specific work areas and authorized users.

Reports and Checklists

To analyze statistics and the status of checklists completed by operators.

Vehicles Status

To monitor the performance and efficiency of each vehicle.

📍 Via Vizzano 44, Sasso Marconi (BO)
