

## OPTIMISE PRODUCTION PROCESSES AND INCREASE EFFICIENCY

In industrial plants, **coordinating operators and drivers is a constant challenge**. Unnecessary waits and disorganised requests slow down productivity and increase operating costs.

**KiwiCall** helps you to **streamline workflows by eliminating unnecessary waiting**. Using strategically placed buttons, **operators send immediate requests to forklift operators**, ensuring a smooth workflow.

### BENEFITS

- **Simplify communication** between forklift driver and operator
- **Zero downtime** in the production cycle
- **Make operations accessible** also to blind operators

Solution for:

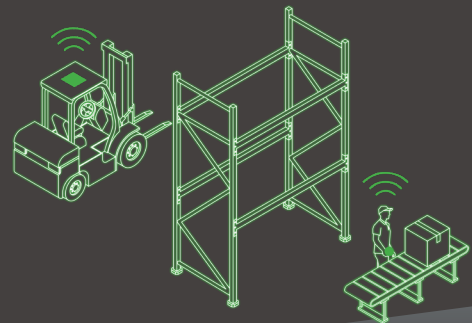

**SIMPLIFY WORKFLOWS**

**REMOVE RADIOS AND TELEPHONES TO CALL THE TRUCK**

**IMPROVE COMMUNICATION BETWEEN OPERATORS**

## MANAGE MULTIPLE PRODUCTION LINES EFFECTIVELY

In large industrial plants with many production lines, coordinating operators and forklift drivers is a constant challenge. Unnecessary waiting and disorganised demands slow down productivity and increase operating costs.

With KiwiCall+ you can handle endless requests simultaneously from a tablet or PC. This way you eliminate unnecessary waiting and create a synchronised and responsive operating environment.

### BENEFITS

- Simplify communication between forklift driver and operator
- Zero downtime in the production cycle
- Improve process optimisation without changing the infrastructure

Solution for:

SIMPLIFY WORKFLOWS

REMOVE RADIOS AND TELEPHONES TO CALL THE TRUCK

IMPROVE COMMUNICATION BETWEEN OPERATORS
