

RISK-FREE OUTDOOR-INDOOR TRANSITION FOR VEHICLES AND OPERATORS

The transition zone between indoor and outdoor environments is one of the most critical areas for company safety: without accurate monitoring, risks increase for both vehicles and operators.

KiwiRoof allows you to set vehicle slowdown when entering covered zones or exiting areas, by detecting the presence of ceilings in real time.

BENEFITS

- Reduce the risk of accidents at the transition points between indoor and outdoor
- Slow down vehicles during the indoor-outdoor passage
- Reduce operational interruptions and increase productivity

Solution for:

**SLOW VEHICLES DURING
ENTRY AND EXIT OPERATIONS**

**REDUCE THE RISK
OF ACCIDENTS IN
HAZARDOUS AREAS**
