

THE WEB PORTAL THAT HELPS YOU OPTIMISE PRODUCTIVITY AND SECURITY

Operating trucks without accurate data increases inefficiencies, costs and operational risks.

KiwiSat is the web portal that collects and analyses fleet data, providing you with useful information to improve safety and efficiency.

BENEFITS

- **Prevent accidents** by identifying hazardous areas through heatmaps, which show you nearmisses and critical areas of your plant.
- **Increase fleet productivity** by reducing operational costs related to maintenance and downtime.
- **Improve efficiency and responsiveness** by saving travel and on-site interventions, thanks to remote management of your fleet operations.

Solution for:

ANALYSING RISKS

MONITOR YOUR MEANS

OPTIMISING RESOURCES
