

## SAFE AND AUTOMATED MANAGEMENT OF ZONES AND GATES

In industrial environments, **manual management of access and vehicle speed can lead to errors**, increasing the risk of accidents and slowing down operations.

KiwiZone **slows down vehicle speed** when it passes through gates equipped with the same technology, maintaining the slowdown until the vehicle exits.

### BENEFITS

- **Reduce the risk of accidents** by automating access to hazardous zones
- **Improve logistic flow** in areas with electronic gates and checkpoints
- **Ensure operator safety**

Solution for:

**SLOW VEHICLES IN DESIGNATED AREAS**

**REDUCE THE RISK OF ACCIDENTS IN HAZARDOUS AREAS**
