

## REDUCE THE RISK OF COLLISION IN MANOEUVRING OPERATIONS

In industrial plants, accidents between machines and people during the handling of goods represent a complex safety and productivity challenge.

Radar with lidar technology detects all types of obstacles and reduces the risk of accidents by ensuring maximum coverage.

### BENEFITS

- Reduce the risk of accidents without changing infrastructure or processes
- Avoid dangerous manoeuvres and distracting errors during operations
- Save significant resources and reduce costs related to incidents and disruptions

Solution for:

INCREASE SAFETY

REDUCE THE MARGIN OF HUMAN ERROR

REDUCE OPERATING COSTS
