

# WiKam

## REDUCE THE RISK OF COLLISIONS BETWEEN VEHICLES AND PEDESTRIANS

In industrial environments, accidents between machines and people pose a serious challenge to safety and productivity.

WiKam is the **AI-powered monocamera**, ideal as an entry-level solution for real-time monitoring. The device can **detect people, even from behind or when crouching.**

### BENEFITS

- **Reduce the risk of accidents** without altering infrastructure or processes
- **Avoid dangerous maneuvers and distraction errors** during operations
- **Save significant resources and cut costs** related to accidents and downtime

### Solution for:

INCREASE SAFETY AND PRODUCTIVITY

MINIMIZE HUMAN ERROR

REDUCE OPERATING COSTS
